Full-Stack Developer (Mid-Level) working with AngularJS (1.X), JavaScript, HTML, CSS and Ruby Rails. Experience with Web Application Development (both front and backend) and developing relational database systems.

SKILLS

Languages: JavaScript, Ruby, MySQL, CSS, HTML

Frameworks/Libraries: AngularJS, Rails, VueJS, SASS

Platforms: OSX, Linux

WORK EXPERIENCE

MortarStone LLC

Team Lead: DECEMBER 2016 - PRESENT

- Incharge of a small group of four other developers adhering to an agile work environment. While still being a full-time developer.
- Review new code before deploying to production and setting up continuous integration. Documenting MortarStone best practices for core sections of code. IE: The Backup Servers
- Taking on business admin role. Managing all services the company uses and onboarding new staff.

Full-Stack Developer: FEBRUARY 2015 - NOVEMBER 2016

- Creating Ruby on Rails Microservices / APIs.
- Creating a connection between Frontend and Backend applications using different languages/Frameworks. AngularJS and Ruby on Rails.

Front-end Developer: OCTOBER 2014 - JANUARY 2015

- Recreating an older Web UI with updated styles and a new framework AngularJS.
- Working alongside a designer to deploy fully functional web application.

Reno Collective Presentation DECEMBER 2015

- Presentation about making Microservices with Ruby on Rails specifically to handle PDF creation.
- Including examples, use cases, testing and building from a third-party API.

EDUCATION

Truckee Meadows Community College, Reno NV

AUGUST 2012 - DECEMBER 2014

Computer Science Major before receiving a job offer. Left before completing my Bachelor's Degree. Working as a full-time developer since October 2014, continuing my education through self-teaching.

My latest projects are <http://www.126hours.com> and <http://www.blakecampbell.com>
